We want to introduce you to our aluminium ASTIN and JOKER system, also to SOGAL steel system. 11 different handles (6 Astin, 3 Joker, 2 Sogal) and 15 various colors allows to decorate any home space. Modern and convenient form of the profiles gives to each door a unique charm and attractiveness. The system allows you to produce sliding, pull-apart, folding and even pivot doors. Profiles is used with 4-18 mm. thickness fillers. Combining different materials, the door is divided according to the required design (diagonally, horizontally, vertically, or even custom winding angle). Market news is polished aluminium profiles Prestige and Elite. Polished surface has a unique image and impeccable quality. Prestige and Elite system has no analogues. For door mechanism we give a 10-year guarantee.

**NEW HEROS** – aluminium profile with stud aluminium tape and amortization brush, which covers all of the holes made during door manufacturing proces.
